

SURGICAL SPECIALTY CENTER of Westchester

*Now offering two
revolutionary laser technologies:*

PRECISION TX LASER TREATMENT, FDA approved for the treatment of HYPERHYDROSIS or EXCESSIVE ARMPIT SWEATING. This minimally invasive laser ablates the axillary glands in the armpit area during a one-time, one hour procedure. Perfect for patients looking for optimal results with the least amount of downtime!

AND

FEMTO SECOND LASER for cataract extraction uses a state-of-the-art image guided system and laser to create the necessary incisions. This is the most advanced technology available for the treatment of cataract, allowing for the possibility of increased precision, better accuracy and a custom refractive outcome.

**Ask your surgeon about the
Precision Tx and FEMTO Laser today!**
